SUMMARY

Frontend engineer with 4+ years of experience building web apps with React, TypeScript, and Remix. Most recently built a B2B quoting platform on Shopify that cut quote processing time by 83%. Focused on performance optimization and Core Web Vitals. Comfortable working in agile teams.

SKILLS

Frontend: React 18, TypeScript, JavaScript (ES6+), Next.js, Remix, React Router, Redux Toolkit (RTK Query), Context API, Hooks, GraphQL (Consumption), HTML5, CSS3, Tailwind CSS, Responsive Design, Polaris Design System, Figma (Design-to-Code)

Performance: Core Web Vitals (LCP, CLS), Virtualization, Code Splitting, Lazy Loading, Optimistic UI

Testing: Jest, React Testing Library

Backend & Tools: Node.js, REST APIs, Shopify Admin API, Git, Prisma ORM, Drizzle ORM, AWS SES, Cloudflare Pages, Postman, CI/CD

WORK EXPERIENCE

Full Stack Web Engineer (Contract) – MTI Corporation

Mar 2022 – Present

Materials Science Equipment, Est. by MIT & UC Berkeley Researchers • Richmond, CA

- Built a B2B quote management app using Remix and Polaris Design System. Set up server-side data fetching and parallelized API calls, which reduced quote processing time by 83%.
- Created a dual-cart system with Redux Toolkit so Retail and Wholesale customers could be managed separately without data conflicts.
- Set up an automated PDF generation flow using jsPDF, html2canvas, and AWS SES to create quotes and send them via email, replacing a manual process.
- Added unit tests with Jest and React Testing Library, reaching 90% coverage on checkout flows and catching regressions earlier.
- Worked with sales and ops teams to scope features, and wrote internal docs to help new devs get up to speed faster.

Frontend Developer (Independent Projects) – Remote

May 2020 – Feb 2022

- Built marketing sites and real-time dashboards with React, Next.js (SSG/ISR), and Google Maps API during a training program.
- Practiced performance tuning on these projects, reduced LCP by 25% through route-based code splitting and lazy loading.

PROJECTS

TagWise AI – AI-Generated SEO Tagging App

2025

- Built a staging system in React 18 that lets users compare original tags vs. AI-generated drafts before pushing changes through Shopify GraphQL API.
- Created a product dashboard with Remix and list virtualization to handle 100+ items at 60fps with real-time SEO score updates.
- Cut perceived latency by 40% using Optimistic UI patterns and Vite-based code splitting for the AI streaming flow.

AI Component Playground

2026

- Built a tool that generates React components from text prompts using Next.js 14, TypeScript, and Vercel AI SDK, with live preview via Sandpack.
- Handled streaming-to-editing handoff with a two-phase state model, plus error recovery for incomplete AI output and rate limiting.

EDUCATION

M.A. Web Design & New Media

2018 – 2020

Academy of Art University, San Francisco

CERTIFICATIONS

Postman API Student Expert (2025) | Google Cloud Apigee Labs (2025) | SQL for Data Analysis, Coursera (2025)

Languages: English, Mandarin
